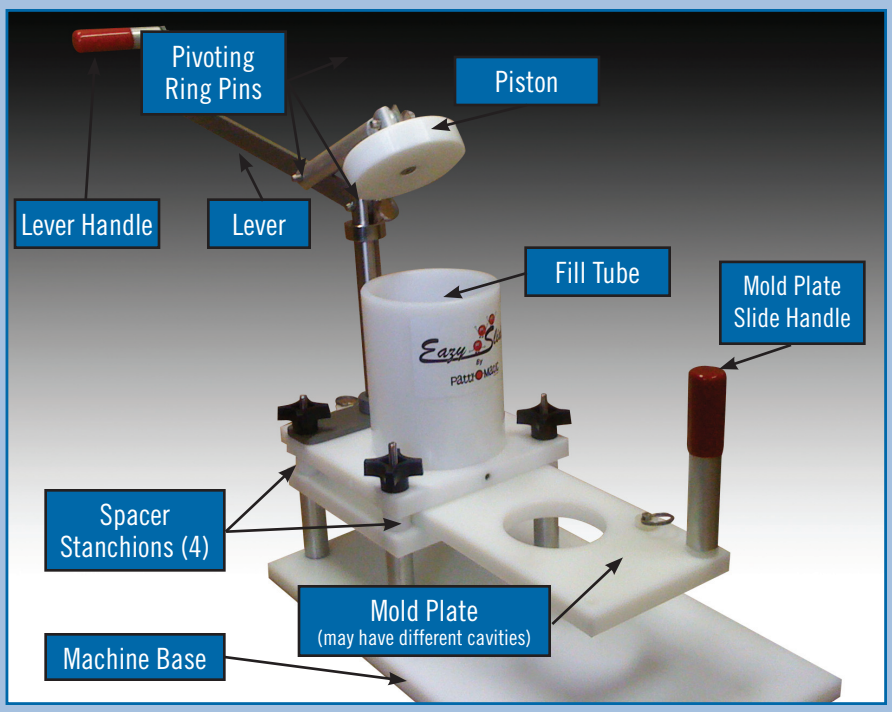
OPERATING INSTRUCTIONS FOR THE EAZY SLIDER



THE EAZY SLIDER MACHINE IS USED TO PORTION AND FORM FOOD PRODUCTS

STEP 1: Put product in the fill tube. Fill only to 1" from the top.

STEP 2: Lower piston to the top of the product.

STEP 3: Pull down on the lever handle to fill the mold cavity. While keeping a slight pressure on the lever handle with one hand, use your other hand to grip the mold plate handle and slide the mold plate out until it is fully exposed.

STEP 4: Remove patties from the mold plate and repeat steps 1-3.

For the operator's preference, the lever handle and the mold plate slide handle may be attached to either the right or left sides.

THE EAZY SLIDER DOES IT ALL!
