

The smoke generator generates smoke by burning wood chips. The smoke generator is made of stainless steel, grade AISI 304. Sensors and spray nozzles are installed in the chip magazine and in the combustion chamber to extinguish any flames. This means that the generator may also be used at night without supervision. The automatic controls of the generator are built into smokehouse controller.

TECHNICAL DATA:

Dimension	WIDTH 472 mm
	HEIGHT 1986 mm
	LENGTH 794 mm
Weight	150 kg
Prepared for controller	iMax 500
Available voltages	1ph x 120V 60hz
	3ph x 208V 60hz
Construction material	INOX 304
